

FLOMASTA LIQUID INJECTION KIT

WHY FLOMASTA?

The Flomasta Liquid Injection system has stand out features for Australian farmers including:

- Cost effectiveness
- It arrives in one box for easy DIY assembly
- Versatility and reliability
- Easy application of Metagen inoculants

APPLICATION EQUIPMENT

The Flomasta offers growers a breakthrough in liquid injection systems. It is cost effective, easy to assemble and comes in numerous row sizes.

Flomasta liquid injection system is endorsed by Metagen Australia as ideal for the application of microbial formulations — for droplet size adaptability, reliability and accuracy.

THIS KIT INCLUDES

- 1 flow divider (distributor) with 4 to 18 outlets
- 3 metres of non friction gravity hose per outlet
- 4 distributor head nozzles
- Clamps and brackets to attach to the planter
- An in-line filter

TECHNICAL FEATURES

Made by Cougar Technology, the head is mounted in a position high enough to enable the nutrients to flow via gravity through multiple hoses.

The material is pumped from the tank to the head through an 800 micron filter.

A wobbler places the liquid into pockets in the head and each pocket is emptied via a hose positioned behind a tyne.

PRICE LIST

Item #	Flomasta kit size	Price (ex GST)
4050 / 4	4 Row Kit	\$943.00
