EVERGROW NP

**A Soil Biostimulant
for Poaceae Root Exudates**

Sugarcane. Pasture. Cereal Crops.

Evergrow NP is an advanced soil treatment formulated for poaceae root systems such as sugarcane, sorghum and wheat. It is also highly effective for cover crop incorporation. Evergrow NP is soil applied to improve the bioavailability of soil resources for crop production.

SHAKE CONTAINER WELL PRIOR TO USE

INCLUDES ACTIVATOR

DIRECTIONS

- Recommended rate: 4–6 L/ha. The rate depends on your crop type and crop health. Apply as advised by your agronomist.
- Mix Evergrow NP into water and apply with moisture or during moist conditions.
- Evergrow NP has an accumulative effect and is best applied every 6–12 months depending on your system.

APPLICATION METHODS

- Over dunder, manure, cover crops or compost at the time of light incorporation.
- Through irrigation. Pressure should be below 80 psi at any point in the system.
- Via boom spray. This should be done in damp conditions or followed by irrigation. Higher water rates (400 L/ha+) need to be used in the absence of irrigation to wash the product into the soil. Filters should be 50 mesh or larger.
- Via liquid/water injection systems.
- Via aerial application in moist conditions.
- In sugarcane apply in a stool splitter with granular fertiliser, or add to dunder or other liquid fertilisers.

Once mixed, must be used within 24 hours.

Reseal immediately after use.

This product is distributed by a certified Metagen agronomist. Consult with your agronomist for specific application instructions for your crop. Ideal timing, rates and method of application can vary across systems.
